
PRISMA Workshop "Lattice Gauge Theory"

29 and 30 April 2013

Seminar Room, Helmholtz Institute Mainz

Monday, 29 April 2013

- 8:30 Christian Hoelbling (Wuppertal)
"Masses of hadrons and quarks"
- 10:45 Harvey B. Meyer (Mainz)
"Spacelike and timelike form factors from lattice QCD"
- 14:00 Brian Tiburzi (City College New York)
"An electroweak look inside hadrons with lattice QCD"
- 16:15 Marc Wagner (Frankfurt)
"Spectrum, decays and structure of mesons from lattice QCD"

Tuesday, 30 April 2013

- 9:00 Stefan Schaefer (CERN)
"Algorithms for lattice QCD on fine lattices"
- 11:15 Andrea Shindler (CERN)
"The quest to solve QCD from light to heavy quarks"
- 14:30 André Walker-Loud (LBNL)
"The nucleon, lattice QCD and implications for physics in and beyond the Standard Model"

All are welcome!
